

PARTS LIST

Top Row-Left to Right

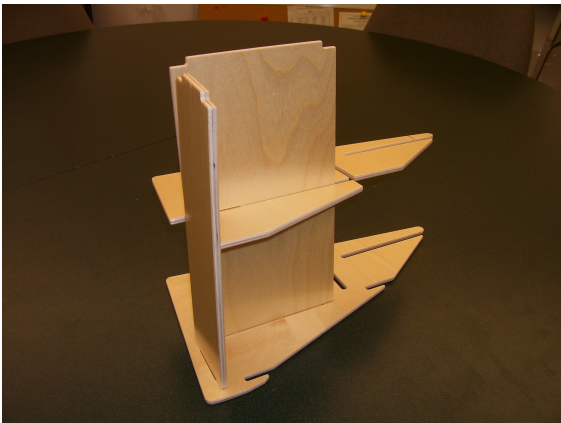

- (1)-Short Back
- (2)-Sides
- (1)- Middle Brace

Bottom Row-Left to Right

- (2)-Shelf Floors
- (1)-Printed Back/Header
- (2)-Acrylic Fronts (please remove blue masking)

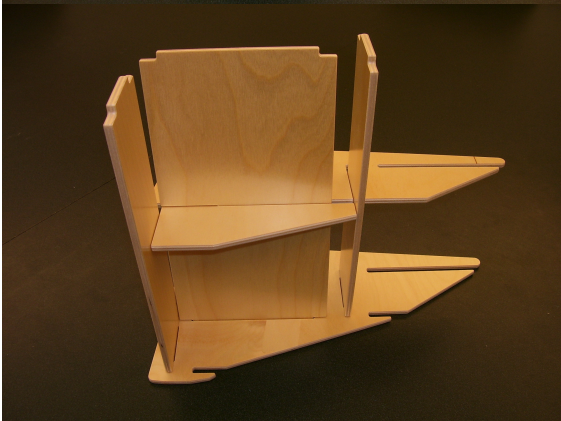

Assemble the middle brace and the shelf back.

If you lay one of the sides down on a table and work with it this way assembly can go much easier.

Insert the long tab of the middle brace into the long groove. Then you can put one of the shelf floors into the bottom short groove.

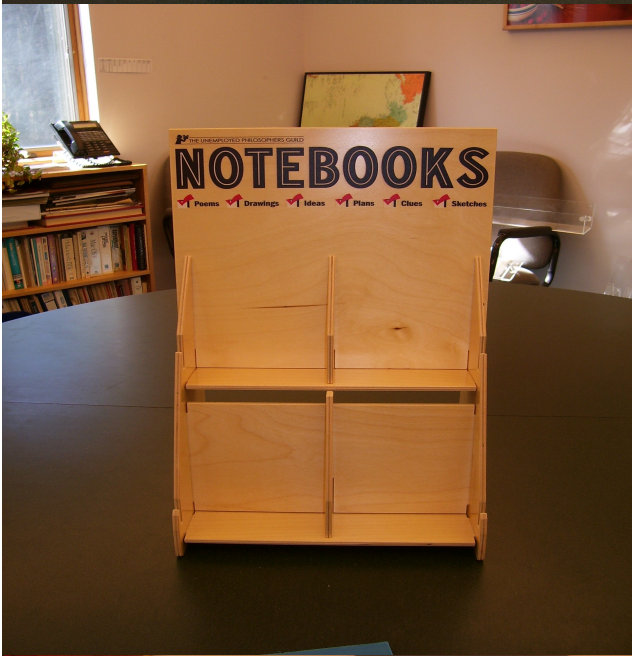

Slide the second shelf floor into the groove cut into the middle shelf and insert the tab into the short groove on the side.

Place the second side on top of the unit and fit all the tabs into the slots.

After this is done very carefully stand the unit up using both hands to steady the sides.

Slide the printed back/header into place.

Once this is done be sure to remove the masking from the acrylic fronts.

Slide the fronts into the slots in front of the shelves.

There you have it!

This photo shows the acrylic fronts with the masking still in place. Be sure to remove it before you put the fronts on.
