

Assembly of the Plywood Mini Tower Spinner

1. Carefully unpack and locate all parts before beginning assembly. Use the illustration at left to identify and orient parts.
Note: side panels have a small logo sticker at the bottom.

2. Attach the Top and Bottom Panels to a side panel with the 5/8" wood screws in the pre-drilled holes. Then attach the notched shelves as shown. Make sure the top panel has the groove facing down.

- 1/4" post and screw sets (8)
- 3/8" post and screw sets (2)
- 1-5/8" wood screws (16)
- Birch screw covers (16)

3. Slide the 3 dividers into the grooves between each shelf. The divider with the drilled holes goes on the top shelf with the holes at the top. All dividers should fit flush with the ends of the shelves.

4. Attach the 2nd side panel with the wood screws. Make sure to locate the logo sticker at the bottom to match the first side - this will align all the holes for optional attachments.

See the reverse side for positioning and attaching additional accessories

5. Slide the Printed Header Sign into the slot in the Top Panel and align the drilled holes with the holes in the divider. Use the 3/8" Post and Screw sets to secure the sign to the unit. Cover the wood screw heads with the self adhesive Birch Covers.
